

Cystic Fibrosis Survey

What treatment option would *you* choose?

We would like to invite people ≥ 13 years living with CF as well as carers responsible for children with CF (birth to 18 years) to participate in an online questionnaire to work out what you think is most important when considering treatment options for pulmonary exacerbations.

 This questionnaire will take roughly **20 minutes** to complete.

 Your answers will remain **confidential**, which means nobody will be able to identify you if you take part.

Results will help inform how we measure treatment success in the upcoming BEAT-CF trial, which will evaluate the best treatment(s) for pulmonary exacerbations.

This research is being led by a team at **Telethon Kids Institute**, Perth, Australia.

Copy the following link into your browser to participate:

<https://bit.ly/IMPACT-CF>

Alternatively, use the camera function on your smartphone or tablet device to scan the QR code in the top left corner of the flyer to access the survey

For queries, contact charlie.mcleod@health.wa.gov.au or phone **+61 428 899 886**.
