

BREAKING BARRIERS FOR CYSTIC FIBROSIS

# TODAY'S DEDICATION

DAY 24: SUNDAY 24<sup>th</sup> SEPTEMBER 2023

## Lucas

Lucas was diagnosed with Cystic Fibrosis when he was 4 weeks old after having a heel prick test done at birth.

Lucas enjoys playing basketball and is obsessed with fishing.

Over the years living with CF Lucas has had quite a few hospital admissions and for years we tried to put weight on him as it was a battle!

Trikafta changed that dramatically!

He is now thriving and growing so much that it's bloody awesome!

Lucas played basketball for a while and that's helped with his CF immensely!

All the best to Layne with the marathons 😊
