INNOVATION GRANT 2019

(This project was extended to March 2023 due to COVID restrictions.)

Project Update: Adult- specific complication of gastrointestinal malignancies

The Innovation Grant (sponsored by CF Community Care) has enabled us with the following:

1. Near completion of a Masters in Research, and has kickstarted plans to convert into PhD
2. We have completed study recruitment and now in the data analyses phase. An abstract has been submitted to CF Conference. We anticipate manuscripts arising from this. Earlier preliminary findings were presented as abstract to 2023 European CF Conference.
3. Collaboration with an international research group - with likely more research outcomes arising from this

On behalf of my research team, I would like to thank CFA and CF Community Care again for their funding support.

Kind regards,

Keith

Dr Keith C. Y. Ooi
