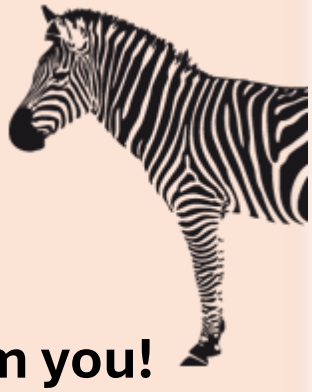
CYSTIC FIBROSIS Australia

Have you, or your family member, undergone **genetic testing** for a **rare disease**?

Chance to win one of two $50 vouchers!



If so, we would like to hear from you!

If this is you, researchers at the University of Tasmania, along with the Tasmanian Clinical Genetics Clinic, invite you to complete a **survey that takes around 30 minutes.**

The survey aims to better understand the experiences of those who have undergone genetic testing for a rare disease (*regardless of the result*).

We are hoping that having more knowledge will allow us to better support Australians living with a rare disease.

To complete the survey, please **CLICK HERE**
